

18 February 2020

Investor Stream interview with CEO

Freehill Mining Limited (ASX: FHS 'Freehill' or 'the Company') is pleased to provide shareholders with the opportunity to view an audiovisual interview with Chief Executive Officer Peter Hinner from the Company's 100%-owned Yervas Buenas magnetite project in Chile.

During the interview, Mr Hinner discusses the recent high grade intersections reported in January (refer ASX announcement: 28 January 2020) and expands on the Company's plans for an updated Mineral Resource Estimate, as well as an update on future project development initiatives.

The interview can be viewed via the following link:

About Freehill Mining Limited

Freehill Mining Limited (ASX: FHS) is a mineral exploration company focused on the development of its 100%-owned Yervas Buenas magnetite project in Chile. Yervas Buenas has proven magnetite mineralisation as well as being prospective for both gold and copper mineralisation. Drilling results to date have so far demonstrated that magnetite mineralisation extends along at least a 2km contiguous corridor of what is shown by geophysics to be a 3km long structure extending from the northern boundary to southern boundary of the property. The company has also identified copper and gold mineralisation testing has commenced with diamond drilling on two IP anomalies highlighted in earlier exploration.
